Autism Spectrum Disorder (ASD) Resources

What is Autism?

Autism, or autism spectrum disorder (ASD), refers to a broad range of conditions characterized by challenges with social skills, repetitive behaviors, speech and nonverbal communication. According to the Centers for Disease Control, autism affects an estimated 1 in 54 children in the United States today.

We know that there is not one autism but many subtypes, most influenced by a combination of genetic and environmental factors. Because autism is a spectrum disorder, each person with autism has a distinct set of strengths and challenges. The ways in which people with autism learn, think and problem-solve can range from highly skilled to severely challenged. Some people with ASD may require significant support in their daily lives, while others may need less support and, in some cases, live entirely independently.

Several factors may influence the development of autism, and it is often accompanied by sensory sensitivities and medical issues such as gastrointestinal (GI) disorders, seizures or sleep disorders, as well as mental health challenges such as anxiety, depression and attention issues.

Signs of autism usually appear by age 2 or 3. Some associated development delays can appear even earlier, and often, it can be diagnosed as early as 18 months. Research shows that early intervention leads to positive outcomes later in life for people with autism.

Seattle Children's Patient and Family Autism Resources

<https://www.seattlechildrens.org/clinics/autism-center/patient-family-resources/>

** In 2013, the American Psychiatric Association merged four distinct autism diagnoses into one umbrella diagnosis of autism spectrum disorder (ASD). They included autistic disorder, childhood disintegrative disorder, pervasive developmental disorder-not otherwise specified (PDD-NOS) and Asperger syndrome.*

Data shows that as of 2018 nearly 1 out of 54 kiddos may have ASD. Boys are 4 times more likely than girls.

Island County Autism Spectrum Disorder Resource Website

Autism Partnership of Island County presents an Island County ASD website of resources for families. Have a concern? Need a screening? Need resources? Need support? <https://www.pilotace.org>

This website also has this Autism Resource Guide in English and Spanish

LEARNING ABOUT AUTISM

Autism Speaks www.autismspeaks.org(888)288-4762 (888)AUTISM2

The Autism Response Team (ART) is an information line for the autism community. Our team members are specially trained to provide personalized information and resources to people with autism and their families. Part of Autism Speaks.

100 Day Kit for Young Children -Knowledge is power, particularly in the days after an autism diagnosis. The Autism Speaks 100 Day Kit helps families of children ages four and under make the best possible use of the 100 days following the diagnosis. This kit will help you learn more about autism and how to access the services that your child needs. It contains information and advice collected from trusted experts on autism and parents like you.

- For Young Children: <https://www.autismspeaks.org/tool-kit/100-day-kit-young-children>
- For School Age Children: <https://www.autismspeaks.org/tool-kit/100-day-kit-school-age-children>

The 100 Day Kit is divided into the following sections: About Autism, Diagnosis, Causes and Symptoms, You, Your Family and Autism, Getting Your Child Services, How is Autism Treated? Making It Happen, A Week by Week Plan for the Next 100 Days, Useful Forms, Glossary and Resources

Autism Speaks has autism info available in the following languages: Arabic (العربية), Bangla (বাংলা), Bosnian (Bosanski), Cambodian (ខ្មែរ), Chinese (中国的), French (Français), Greek (ελληνικά), Haitian Creole (Kreyòl Ayisyen), Korean (한국어), Laotian (ລາວ), Portuguese (Portuguesa), Romanian (Română), Russian (русский), Serbian (српски), Somali (Af-Soomaali), Spanish (Español), and Vietnamese (Tiếng Việt)

Autism Society www.autismsociety.org(800)3-AUTISM

The Autism Society's website is one of the most visited websites on autism in the world and our on-line resource database, Autism Source, and National Contact Center (800-3-AUTISM) provide information and service referrals to thousands of people each year.

Washington State Department of Health Autism Guidebook

Is very large and cumbersome but has some great ideas. <https://doh.wa.gov/sites/default/files/legacy/Documents/8340/970-NonDOH-AutismGd-en-L.pdf>

Conversations about Autism: Seattle Children's Hospital Conversations About Autism is a series of 60-minute live-streamed sessions created for providers and caregivers of children with autism who wish to better understand the autism spectrum disorder. In these sessions, experts and advocates from our region share their knowledge and perspectives on autism as well as helpful tips for supporting a child, adolescent or young adult with autism.

ADULT AUTISM RESOURCES

UW Autism Center: Could I Be Autistic?

A Free Webinar for the Self-Diagnosed and Wondering

Have you felt different from other people your entire life? Did learning about autism seem to explain a lot about you? Presented by the University of Washington Autism Center's autistic psychologist Dr. Lucas Harrington, this 20-minute on-demand video will help you consider the pros and cons of seeking a formal autism evaluation and then provide strategies and resources you can use without an official diagnosis.

Target Audience: Teenagers or adults who have self-identified as autistic or wonder if they are autistic

<https://depts.washington.edu/uwautism/resources/adult-resources/>

HOW DO I KEEP MY CHILD WITH AUTISM SAFE?

National Autism Association offers information on wandering, safety resources and toolkits for caregivers, teachers and first responders that can be downloaded or ordered for free. They also have the **Big Red Safety Boxes** with door alarms and much more (free during grant cycles) to help with safety at home: <https://nationalautismassociation.org/big-red-safety-box/>

Wandering Brochure by NAA.:

It is common that an Autistic child may not understand the dangers of parking lots and open areas. Talk to your child's doctor about obtaining an accessible parking pass.

WHAT IS APPLIED BEHAVIOR ANALYSIS (ABA)?

What is Applied Behavior Analysis? Applied Behavior Analysis (ABA) is a therapy based on the science of learning and behavior.

Behavior analysis helps us to understand: How behavior works, How behavior is affected by the environment, How learning takes place,

ABA therapy applies our understanding of how behavior works to real situations. The goal is to increase behaviors that are helpful and decrease behaviors that are harmful or affect learning.

ABA therapy programs can help: Increase language and communication skills, Improve attention, focus, social skills, memory, and academics, Decrease problem behaviors

The methods of behavior analysis have been used and studied for decades. They have helped many kinds of learners gain different skills – from healthier lifestyles to learning a new language. Therapists have used ABA to help children with autism and related developmental disorders since the 1960s.

COMMON CO-OCCURRING DIAGNOSIS WITH ASD

- **Most Common:** ADHD, General Anxiety Disorder (GAD), Sensory Processing Disorder (SPD) and Depression. Many times the co-occurring challenges are lumped under ASD and are not addressed. Identifying and treating these issues can make a huge difference in behaviors, sleeping, eating, etc.

<https://www.autismspeaks.org/science-blog/genetic-testing-can-guide-interventions-autism-and-its-co-occurring-conditions>

SENSORY/SENSORY PROCESSING DISORDER (SPD)

People with autism might have sensitivities to: Sights, Sounds, Smells, Tastes, Touch Balance (vestibular), Awareness of body position and movement (proprioception), Awareness of internal body cues and sensations (interception).

Autistic people can experience both **hypersensitivity** (over-responsiveness) and **hyposensitivity** (under-responsiveness) to a wide range of stimuli. Most people have a combination of both.

Sensory processing disorder (SPD) is often confused with autism spectrum disorder (ASD) due to the similarities and connections that exist. While the two have many similarities, SPD is often a comorbid symptom of ASD, but not all children with sensory processing disorder have autism.

TUMMY ISSUES

Children with autism spectrum disorder (ASD) tend to have more medical issues, including gastrointestinal (GI) symptoms such as abdominal pain, constipation and diarrhea, compared with their peers.

At the same time, many children with ASD eat only a few foods (selective eating), prefer highly processed foods, and eat fewer fruits, vegetables and whole grains.

How to Detect and Address Gastrointestinal Issues in a Child with ASD

Prescription for diapers/incontinent supplies:

For children ages 4 years and older, diapers can be covered by medical/Medicaid insurance with a prescription. You will need to talk to your child's doctor. Several medical supply companies. Need an annual prescription for diapers with diagnostic code of bowel and bladder incontinence from your child's doctor

SLEEP ISSUES

A 2019 study, one of the largest to investigate the prevalence of sleep problems in autism, suggested that nearly 80 percent of [autistic preschoolers have disrupted sleep](#). Sleep problems are twice as common among children with autism as they are among typical children or those with other developmental conditions.

VISION

Doctors recommend that children with ASD have a functional visual evaluation in order to assess many other important aspects of the visual system, namely: eye movements, eye teaming, eye tracking, visual processing, visual-spatial judgment, and central/peripheral vision. According to research, children with ASD present with a higher incidence of [strabismus](#) (eye turn) ranging from 21-50 percent prevalence, as compared to children without ASD.

Common vision issues include: Poor eye contact, Looking beyond/through objects, Absence of reciprocal play, Extreme fear of heights or absence of appropriate fear of heights, Tracking moving objects accurately, Maintaining eye contact with people, Eye alignment (eye turns), Keeping their eyes from wandering ([amblyopia/lazy eye](#)), Light sensitivity, Head turning (looking at objects from the side of the eyes), Fleeting views or rolling eyes, Visual stimming (flapping fingers in front of eyes)

SEIZURES

Seizures are more common in individuals with autism than in the general population. In the general population, [fewer than 1%](#) of children (age 17 and younger) develop clinical seizures. By comparison, one of the largest studies aimed at identifying the prevalence of epilepsy in children with autism found that among children aged 13 years and older with ASD, 26% were diagnosed with epilepsy. ([Viscidi E.W. et. al, 2013](#)).

EFFECTS OF AUTISM: BOYS VS. GIRLS

More repetitive behaviors

Fewer repetitive behaviors, like hand flapping or spinning

More "restricted", or overly focused - interests

Restricted interests tend to be more socially acceptable

tend to have trouble with vocabulary and word knowledge

better vocabulary and word knowledge

UTSAAH PSYCHOLOGY

Autism Speaks has autism info available in the following languages: Arabic (العربية), Bangla (বাংলা), Bosnian (Bosanski), Cambodian (ខ្មែរ), Chinese (中国的), French (Français), Greek (ελληνικά), Haitian Creole (Kreyòl Ayisyen), Korean (한국어), Laotian (ລາວ), Portuguese (Portuguesa), Romanian (Română), Russian (русский), Serbian (српски), Somali (Af-Soomaali), Spanish (Español), and Vietnamese (Tiếng Việt)

IFSP Individualized Family Service Plan- Ages Birth to 3 years old

No Referrals Needed! The IFSP is a written treatment plan for Early Intervention (EI). It details your child's current levels of functioning, specific needs and goals for treatment (referred to as outcomes). The first step in writing the IFSP will be for the members of your child's team to conduct various types of assessments to identify your child's individual strengths and needs. The IFSP will include information about your child's current level of development in the following areas: Physical development, Cognitive development, Communication development, Social & emotional development, Adaptive development, Fine and gross motor skills, Vision, Hearing, etc. The IFSP is developed with input from the child's entire family, and it includes features that are designed to support the entire family.

Whidbey Island: Toddler Learning Center (360)679-1039

Camano Island: Sherwood Community Services (360)629-1236

IFSP	IEP
Birth through age 3	Age 3-21
Is inclusive of the family's needs	Focuses on the child's needs
Services provided in natural environments	Services provided at school
Families are assigned a service coordinator	No service coordinator
Generally reviewed every 6 months	Generally reviewed 1x per year
IFSP Team makes decisions	IEP Team makes decisions
Governed under Part C of IDEA	Governed under Part B of IDEA

IEP Individualized Education Program- Ages 3 to 21 years old. Special Education

Approximately 143,000 eligible students in Washington State receive special education and related services. The Office of Superintendent of Public Instruction (OSPI) fulfills the requirements of the federal Individuals with Disabilities Education Act (IDEA), which ensures all children with disabilities have access to a free appropriate public education. To find your local contact information check page 5 for Child Find. <https://www.k12.wa.us/student-success/special-education>

Guide to IEP Toolkit

<https://www.autismspeaks.org/tool-kit/guide-individualized-education-programs-iep>

How does a **504 plan differ from an IEP**? The basic difference between an IEP and a 504 plan can be summed up in one sentence: both plans provide for accommodations, but only an IEP provides for specialized instruction for students in grades K-12, while a 504 plan can serve students at both the K-12 and college levels.

Everett: (425)740-6400 Mt. Vernon (360) 429-3103 Email: DD3FSO@dshs.wa.gov

• **Island County Developmental Disabilities** Mike Etzell(360)678-7883

Coordinates, funds, and manages local services for children from birth to three and for adults 21 and over who have developmental disabilities. We work actively with families, schools, the business community, as well as local, state, and federal governments to facilitate full contribution for all citizens who experience developmental disabilities. Our underlying belief is that all individuals with developmental disabilities have the skills, interests, and talents to enhance their community and have a responsibility to do so. We also know that employment is a powerful way to contribute both to the larger community as well as to continue to grow and learn. MikeEt@islandcountywa.gov
